Activity Report of Solid State Physics Section, Synchrotron Radiation Science Division I KEK IMSS (2014-2020)

And Report by Science Advisory Committee

## **Table of Contents**

| 1 | Executive summary            |  | 2  |
|---|------------------------------|--|----|
| 2 | Introduction                 |  |    |
|   | 2.1                          | KEK and Institute of Materials and Structure Science (IMSS)          | 6  |
|   | 2.2                          | Solid State Physics Section  | 8  |
| 3 | Research Projects and Topics |  |    |
|   | 3.1                          | Element Strategy Initiative for Electronic Materials                 | 11 |
|   | 3.2                          | Inorganic Materials Structure Project                                | 17 |
|   | 3.3                          | Resonant X-ray Scattering Study for Condensed Matter Science         | 20 |
|   | 3.4                          | Structural Investigations of Molecular Systems                       | 26 |
|   | 3.5                          | Study of Photoinduced Phase Transitions                              | 31 |
|   | 3.6                          | Theoretical Study of Permanent Magnets                               | 35 |
|   | 3.7                          | Operando Observation of Chemical and Magnetic States at Interface of |    |
|   |                              | Functional Thin Films  | 37 |

## Appendix

| • | Publication List | 45 |
|---|------------------|----|
|   |                  |    |
