

Content

High Energy Physics

HEP_01: ILC TOP

HEP_02: ILC ECAL

HEP_03: Composite models and their phenomenology at the LHC

Flavour Physics

FLAV_01: Characterization of the SuperKEKB beam induced background during the BEAST commissioning of the Belle II experiment

FLAV_02: Flavour physics : joint efforts towards searching for physics beyond the SM

Hadron Physics

HAD_01: Measurements of Jets and Photons in Heavy Ion Collisions at the Highest Beam Energy during the LHC-Run 2 by ALICE

Neutrino Physics

NU_03: Precise measurement of neutrino oscillation angle θ_{13} using reactor neutrinos

NU_04: WA105 and its related R&D on innovation double phase charge readout system and light readout system at liquid Argon temperature

NU_05: Precision neutrino cross-section measurements and modeling for long-baseline oscillation experiments

Muon Physics

MU_01: Gminus2edmcomet

Astroparticle

ASTRO_01: Towards a new era in ultra-high-energy cosmic-ray studies (UHECRs)

ASTRO_02: Cosmology with CMB Polarization Measurements

Detector R&D

D_RD_09: Towards the final design of a TPC for the ILD detector

D_RD_11: Prototype development of a positron emission tomography detector using liquid Xenon

D_RD_14: Development of photosensor with SOI technology

D_RD_15: Innovative design concepts in P Bulk Planar Pixel Sensors

Accelerator R&D

A_RD_01: Development of an optical cavity system for the ILC and advanced photon source

A_RD_06: Study and optimization of the power disposition density in new positron targets

A_RD_07: Design and simulation study for a high performance SC cavity shield

A_RD_08: Collaboration on fast luminosity measurements and MDI questions for super B meson factories

A_RD_09: Effort towards improving large scale production of SC cavities

A_RD_10: Nanometer stabilization studies at ATF2

A_RD_11: Development and validation of Input Power couplers for superconducting Linacs

A_RD_13: Development of the technologies for a compact and intense proton driver

Computing

COMP_01: R&D for ATLAS GRID computing

COMP_03: Computing platforms for future experiments

Applications

APP_01: The Geant4-DNA project at the Physics-Biology frontier

APP_02: Study of biomolecular ion stability in gas-phase by two complementary approaches : a cryogenic storage ring and a device for molecular cluster irradiation
