KEK Archives Office

Establishment

Date : April 1, 2004 (preparation form April of 2002)

Purpose

KEK Archives Office is an organization for preserving, as historical materials, documents and other records of importance received from KEK and related institutes.

will be a more appealing "**information center**," accessible to each and every person.

The activities of KEK Archives Office

KEK Archives Committee	To advise the activity of KEK archives office This committee organize not only inside of KEK staff but also professional archivists and researchers from outside
Accession	To collect historical materials, documents and other records of importance received from KEK and related institutes
Cataloging and Arrangement	Catalogs of files (i.e. catalogs of bound volumes of documents and records) are created and preserved in the stacks area
Management of archives DB	To search, via the internet, the catalog information and digitized images of the records preserved by KEK Archives Office
Microfilming, etc.	To microfilm in order to prevent the originals from being damaged or soiled by reading, etc. To digitize in order to search, via the internet, making to view catalog information and digitized images of the records

The activities of KEK Archives Office

To available for public use from ***September 1st of 2010***

Rules Governing Use of Archives (利用規則)

- Use of Materials
- Duplication, Publication, and Citation
- Restrictions on Use

The Freedom of Information Act (情報公開法)

The Protection of Privacy Act (個人情報保護法)

Administrative
provisions

文書管理規程 改訂

Rules Management of
Records and documentation

公文書等の管理に関する法律

2009.7.1 公布(announcement)

2011.April 施行(implementation)

「時を貫く説明責任」

The activities of KEK Archives Office

KEK Archives Committee	To advise the activity of KEK archives office This committee organize not only inside of KEK staff but also professional archivist, researcher from outside
Accession	To collect historical materials, documents and other records of importance received from KEK and related institutes
Cataloging and Arrangement	Catalogs of files (i.e. catalogs of bound volumes of documents and records) are created and preserved in the stacks area
Management of archives DB	To search, via the internet, the catalog information and digitized images of the records preserved by KEK Archives Office
Microfilming, etc.	To microfilm in order to prevent the originals from being damaged or soiled by reading, etc. To digitize in order to search, via the internet, making to view catalog information and digitized images of the records

The activities of KEK Archives Office

Mainly accession;

- presentation documents from retired staffs
- presentation documents from INS
- public documents from KEK Administration Bureau

Collection list and present condition of cataloging are
available to find out on KEK Archives HP

<http://www.kek.jp/archives/resources/index.html>

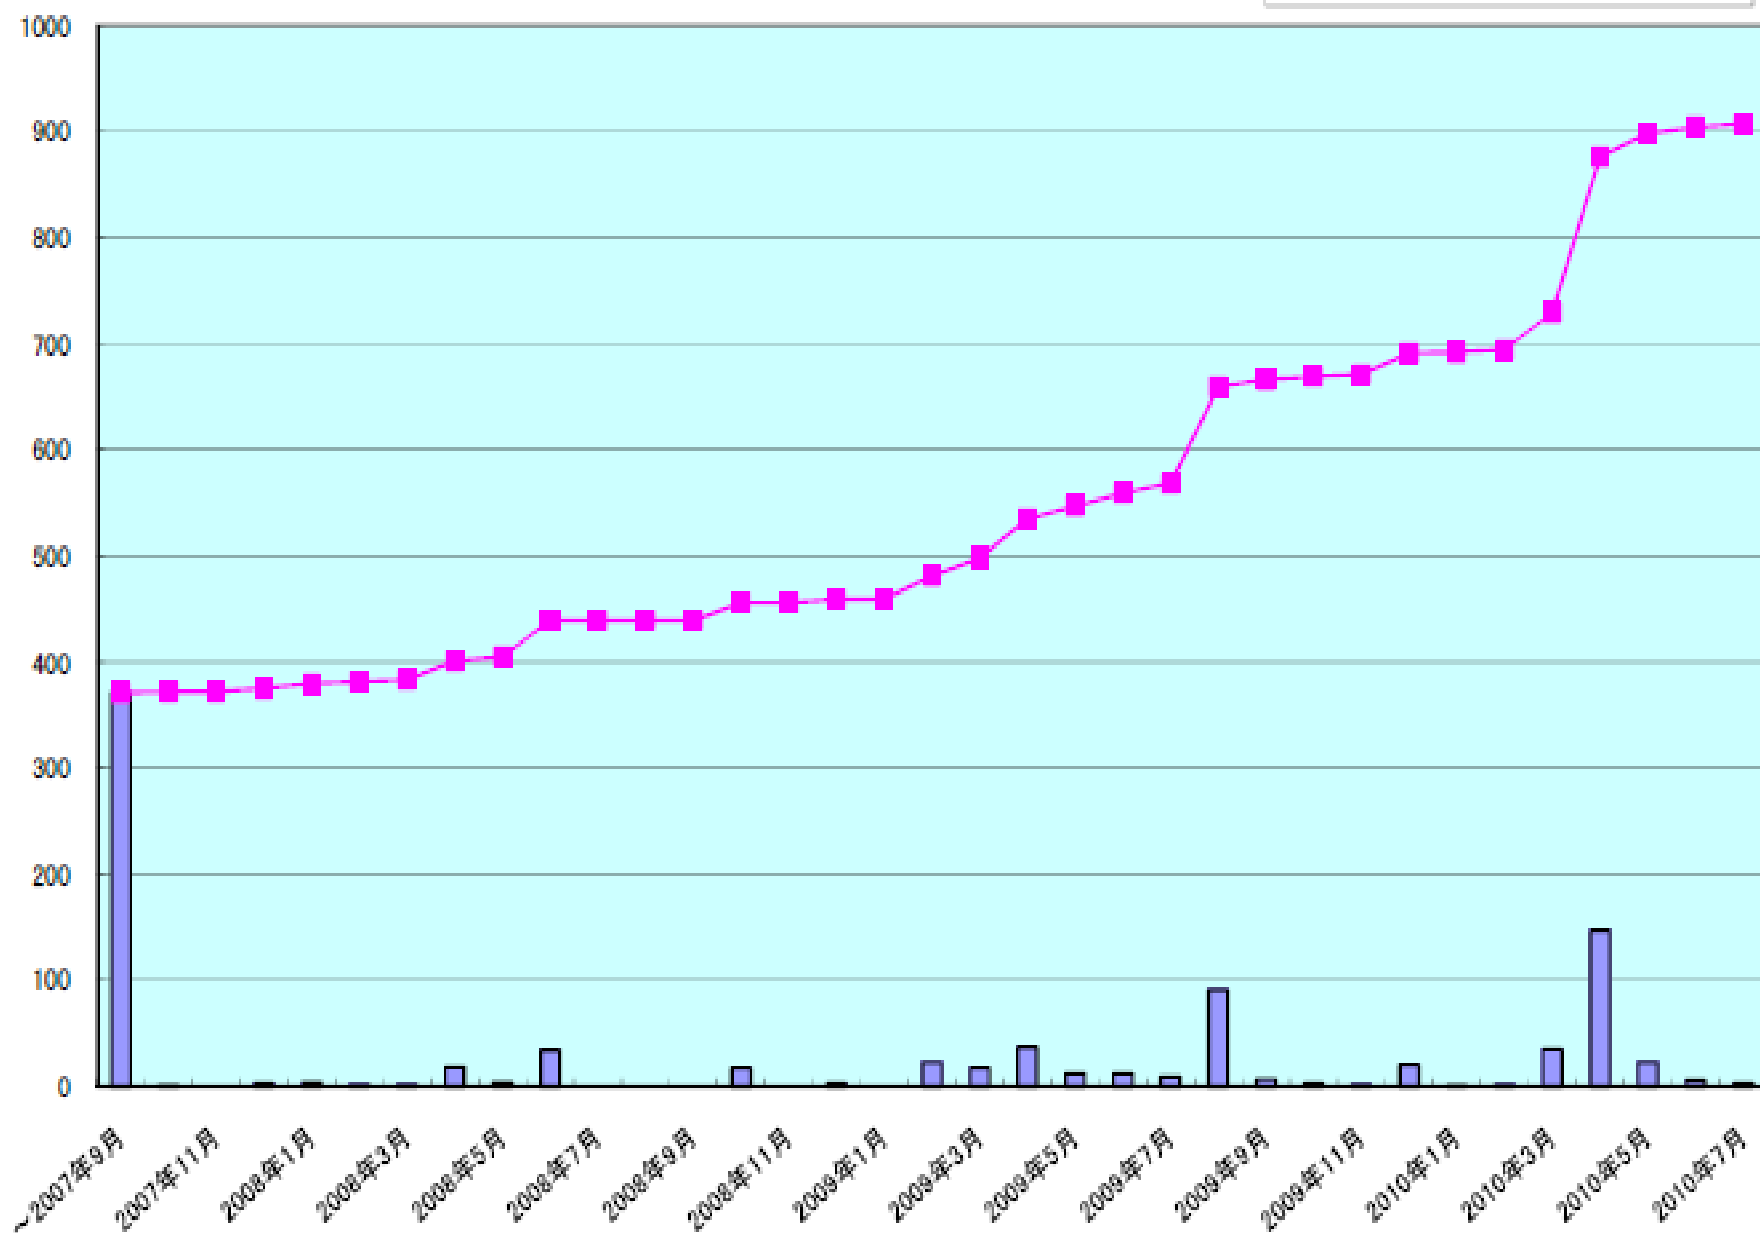

KEK史料室保管庫@日光実験棟地下2階

旧保管庫のあった2号館の改修工事に伴い、2007年8月に移設された。

Welcome to our KEK Archives Office !

High Energy Accelerator Research Organization (KEK), since founded as National Laboratory for High Energy Physics in 1971, has been the center of particle physics in Japan with the 12GeV PS, Photon Factory, TRISTAN and KEK-B Factory and has produced many splendid results.

The reorganization of KEK in 1997 made former Institute for Nuclear Study (INS) of the University of Tokyo to join into the new KEK. As they had been the central research facility in nuclear science before former KEK was established, this made us able to access to their enormous amount of historically valuable documents in particle and nuclear physics.

The KEK Archives Office was created in 2004 under the former Director General Hirotaka Sugawara.

What are the "historical materials-archives" for us? We occasionally find quite valuable information either piled up or discarded. They often are very important for historians and physicist who will plan for future.

The past information could give a great insight for how to proceed. KEK archives office has been working hard to make these disregarded historical evidences into a usable form for all occasions. One of our activities includes

The activities of KEK Archives Office

Films of the Bubble Chamber (about 2000 rolls)

1972 Analysis section open at Tanashi

1974 Move to Tsukuba

Automatic Analyzer (KAMA)

1975 1m Bubble Chamber at Tsukuba

4.5GeV/c πp (SLAC), 400GeV/c pp (FNAL)

1978 About million films got with Ta target

.....

- To make sure of the selection (cut off) level
- To preserve in the stacks area
- To prevent films from damaging

The study of records managements and archives 「文書管理とアーカイブズ」研究会

- planed to couple with the 3rd KEK Archives Committee
- January 22 and 23, 2009
 - 22nd afternoon keynote lectures and reports
 - 23rd morning a tour of Tsukuba Annex of the National Archives
 - afternoon the 3rd KEK Archives Committee
- keynote lecturers:

the National Archives	Y. Ohara	
SOKENDAI	S. Yagyu	
Gakushuin University	M. Ando	(committee member)
Kyoto University Archives	S. Nishiyama	(committee member)

Science Archives Network

- Members are basically participating in the Graduate University for Advanced Studies (SOKENDAI)
NIFS, IMS, NIPS, NAOJ (NINS)
NiPR, KEK, SOKENDAI,
Takaiwa (NTUT), Gotoh (KU)
- 6-years project was done 「大学共同利用機関の歴史とアーカイブズ」
- Next Projects
 1. Cross-reference searching system ex) EAD, ...
 2. Archives = response to the next project
and accountability for our activities

Institutes Abbreviation:

NINS: National Institutes of Natural Sciences
(自然科学研究機構)

NIFS: National Institute for Fusion Science (核融合科学研究所)

IMS: Institute for Molecular Science (分子科学研究所)

NIPS: National Institute for Physiological Sciences (生理学研究所)

NAOJ: National Astronomical Observatory of Japan (国立天文台)

ROIS: Research Organization of Information and System
(情報・システム研究機構)

NiPR: National Institute of Polar Research (国立極地研究所)

KEK: High Energy Accelerator Research Organization
(高エネルギー加速器研究機構)

KEK Archives Office

What's our target?

- to take a leading part of Japanese particle and nuclear physics, materials structure, and accelerator sciences archives
- to promote an international collaboration on archival technologies and related works
- to share the database and to form networks among not only the domestic but also the international cooperative researchers and institutes.

These Activities are of course carried out and only to be accomplished through strong supports from the Sokendai (総研大: Graduate Univ. for Advanced Study) and other Institutions.

Thank you for your attention.
