APPENDICES

Site and Organization

1. PF Light Source Building
   Experimental Hall
2. PF Office Building
3. PF Preparation Laboratory
4. PF-AR (PF Advanced Ring)
5. PF-AR Experimental Halls
6. Structural Biology Building
   (Structural Biology Research Center)
7. PF/KEKB (KEK B-Factory) Injector Linac
8. Slow Positron Facility
9. Building No.4
   (IMSS Office/Condensed Matter Research Center)
10. Kenkyu Honkan Building
11. Dormitory/Guest House
12. Restaurant/Cafeteria
13. ERL Test Facility
KEK consists of four research institutions, i.e., the Institute of Materials Structure Science (IMSS), the Institute of Particle and Nuclear Studies (IPNS), the Accelerator Laboratory (AL), and the Applied Research Laboratory. As shown in Fig. 1, the IMSS constitutes the Synchrotron Radiation Science Divisions I and II, the Neutron Science Division, the Muon Science Division, the Structural Biology Research Center, the Condensed Matter Research Center and IMSS Instrument R&D Team.

Photon Factory (PF) consists of two divisions of the IMSS (the Synchrotron Radiation Science Divisions I and II) and the Accelerator Division VII of the AL as shown in the organization chart of Fig. 2. The staff members of the PF are listed in Table 1. Synchrotron Radiation Science Divisions I and II consist of five beamline groups (electronic structure group, condensed matter group, materials chemistry group, life sciences group and slow positron group), three engineering and administration groups (industrial application research, beamline engineering, technical services & safety group and user support & dissemination group) and two working groups (ultrafast dynamics group and advanced detector R&D group). The Accelerator Division VII has seven groups, which are named Light Source Group I to VII. The missions of each group are described in parentheses of Fig. 2.

Figure 1: Organization chart of KEK.

Figure 2: Organization chart of PF (as of March 31, 2016).
