APPENDICES

Site and Organization

KEK consists of four research institutions, i.e., the Institute of Materials Structure Science (IMSS), the Institute of Particle and Nuclear Studies (IPNS), the Accelerator Laboratory (AL), and the Applied Research Laboratory (ARL). As shown in Fig. 1, the IMSS com-

prises the Photon Factory, the Synchrotron Radiation Science Divisions I and II, the Slow Positron Facility, the Neutron Science Division, the Muon Science Division, the Structural Biology Research Center, and the Condensed Matter Research Center.

Figure 1: Organization chart of KEK.

The "Photon Factory (PF)" also means a group of divisions, a facility division (Photon Factory), two science divisions (Synchrotron Radiation Science Divisions I and II), and a light source accelerator division (Accelerator Division VI), as shown in the organization chart of **Fig. 2**. The staff members of the PF are listed in **Table 1**. The Photon Factory consists of three sections (administration section, beam line engineering section,

and end station engineering section); the Synchrotron Radiation Science Divisions I and II consist of four sections (surface science section, solid state physics section, structural biology section, and materials science section). The Accelerator Division VI has seven groups, which are named Light Source Group I to VII. The missions of each group are written in parentheses in Fig. 2.

Figure 2: Organization chart of PF (as of March 31, 2020) .

 Table 1: Staff members of the Photon Factory.
