

Mt. Tsukuba 筑波山

Jun. 1- Aug 31 & Dec. 1- Feb. 28

6月-8月 & 12月-2月

Mount Tsukuba is an 877 m (2,877 ft) mountain located in Tsukuba. It is one of the most famous mountains in Japan, particularly well-known for its double peaks, Nyotai-san 877 m (2,877 ft) and Nantai-san 871 m (2,858 ft). Many people climb the so-called "purple mountain" every year for the panoramic view of the Kantō plain from the summit. On clear days the Tōkyō skyline, Lake Kasumigaura and even Mount Fuji are visible from the mountain top. Mount Tsukuba is composed of non-volcanic rocks such as granite and gabbro. (by Wikipedia)
